

INCREASE THE BOTTOM LINE WITH EXPENSE REDUCTION SOLUTIONS. THAT'S BRILLIANT!

On average, about 80% of organizations are overcharged on utility expenses due to calculation errors and discrepancies billed by the utility providers. BSE works with organizations to remove errors and overcharges on utility invoices. We will have suppliers provide you a refund on errors and create uncontested reductions in your monthly bill by removing unnecessary charges.

Types of common errors found:

- Incorrect rate schedule
- Hidden telecom charges
- Incorrect tax classifications
- Telephone cramming charges
- Charges on unused/old lines
- Excessive surcharges

WAYS TO REDUCE YOUR UTILITY EXPENSES

RECAPTURE & REMOVE OVERCHARGES & ERRORS

Our utility bill audit will correct and refund any errors and overcharges found on your utility invoices. You will directly add to your bottom line by removing charges and have the satisfaction of knowing that all of your invoices are 100% accurate.

ABOUT OUR TEAM

Our auditing team has over 40 years of combined experience performing nationwide and within virtually every type of industry. At Brilliant Source, we do not use software programs to target the low hanging fruit, but instead every utility bill is analyzed by our experienced auditing team. In return, around 80% of our audits result in findings!

Telecom Audits

- Audit of all local, long distance, wireless, data, and internet charges
- Evaluation of the cost effectiveness of line charges, usage charges, and feature packages
- Constant monitoring of current changes occurring in all areas for opportunities to lower monthly costs, consolidate services, and remove redundant or outdated charges

Utility Audits

- An audit of all electric, natural gas, and water and sewer bills for errors and overcharges
- A full analysis of current and past usage to ensure all tariffs are correct
- Correction of meter errors, demand errors, rate structures, and unnecessary minimum charges
- An analysis of current utility budgetary spending

WHY DO YOU NEED AN AUDIT?

Many of today's companies overlook the importance of auditing utility and telecom budgets and the accompanying monthly charges. Too often spending in this category is not verified due to an assumption of accuracy and cost efficiency.

We often hear "as long as it looks right, we pay them." The utility company's position is that it is your responsibility to verify your bills. By assuming your bills are correct or there is nothing you can do leaves your company vulnerable to errors and overcharges. An audit may be the best thing you can do now, with the potential of refunds and savings going straight to your bottom line.

HOW TO START?

**No risk. No obligation.
No out-of-pocket costs.**

All we need is a copy of your utility and telecom invoices and any associated contracts. There are no hidden charges. We are purely a contingent based service. Upon completion, we will provide you with a savings summary for your approval.
